Recombinant Human Ephrin-A1/EFNA1 Protein

RPCB1022

Product Information

Product SKU: RPCB1022 **Gene ID**: 1942 **Size**: 10μg

Tag: C-His Reactivity: Human

Additional Information

Expression Host: HEK293 cells **Swissprot**: P20827

Purity: > 95% by SDS-PAGE.

Protein Information

Background: EPH-related receptor tyrosine kinase ligand 1 (abbreviated as Ephrin-A1) also known

as ligand of eph-related kinase 1 or EFNA1, is a member of the ephrin (EPH) family.

The Eph family receptor interacting proteins (ephrins) are a family of proteins that

serve as the ligands of the Eph receptor, which compose the largest known subfamily

of receptor protein-tyrosine kinases (RTKs). Ephrin-A1/EFNA1 and its Eph family of

receptor tyrosine kinases are expressed by cells of the SVZ. Ephrin subclasses are

further distinguished by their mode of attachment to the plasma membrane: ephrin-

A ligands bind EphA receptors and are anchored to the plasma membrane via a

glycosylphosphatidylinositol (GPI) linkage, whereas ephrin-B ligands bind EphB

receptors and are anchored via a transmembrane domain. An exception is the EphA4

receptor, which binds both subclasses of ephrins. Ephrin-A1 and one of its receptor

EphA2 were expressed in xenograft endothelial cells and also tumor cells and play a

role in human cancers, at least in part by influencing tumor neovascularization.

Protein Description: High quality, high purity and low endotoxin recombinant Recombinant Human

Ephrin-A1/EFNA1 Protein, tested reactivity in HEK293 cells and has been validated in

SDS-PAGE.100% guaranteed.

Endotoxin: $< 0.1 \text{ EU/}\mu\text{g}$ of the protein by LAL method.

Formulation: Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.

Storage:

Store at -20°C. Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
