

RPCB1147

Product Information

Product SKU:	RPCB1147	Gene ID:	3587	Size:	10µg
Tag:	C-Rabbit Fc	Reactivity:	Human		

Additional Information

Expression Host:	HEK293 cells	Swissprot:	Q13651
Purity:	> 92% by SDS-PAGE.		

Protein Information

Background: IL10RA (Interleukin 10 Receptor Subunit Alpha, also known as CD210) is a Protein Coding gene. The protein encoded by this gene is a receptor for interleukin 10. Two transcript variants, one protein-coding, and the other, not protein-coding have been found for this gene. CD210 belongs to the type II cytokine receptor family. This protein is structurally related to interferon receptors. It has been shown to mediate the immunosuppressive signal of interleukin 10, and thus inhibits the synthesis of proinflammatory cytokines.

Protein Description: High quality, high purity and low endotoxin recombinant Recombinant Human IL-10RA/CD210 Protein , tested reactivity in HEK293 cells and has been validated in SDS-PAGE.100% guaranteed.

Endotoxin: <0.1EU/µg

Formulation: Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.

Storage: Store at -20°C.Store the lyophilized protein at -20°C to -80 °C up to 1 year from the date of receipt.After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
