# **Recombinant Mouse Icam1 Protein (His Tag)**

## **RPES8446**

# **Product Information**

Product SKU: RPES8446 Expression Host: Mammalian Size: 20μg

Tag: C-His Reactivity: Mouse Accession: P13597

### **Additional Information**

Calculated MW: 50.2 kDa Observed MW: 80-100 kDa

**Sequence**: Gln28-Asn485

#### **Protein Information**

**Background**: Intercellular adhesion molecule-1 (ICAM-1, or CD54) is a 90 kDa member of the

immunoglobulin (Ig) superfamily and is critical for the firm arrest and transmigration

of leukocytes out of blood vessels and into tissues. ICAM-1 is constitutively present on endothelial cells, but its expression is increased by proinflammatory cytokines. The

endothelial expression of ICAM-1 is increased in atherosclerotic and transplant-

associated atherosclerotic tissue and animal models of atherosclerosis. Additionally,

ICAM-1 has been implicated in the progression of autoimmune diseases. ICAM-1 is

a ligand for LFA-1(integrin). When activated, leukocytes bind to endothelial cells via

ICAM-1/LFA-1 interaction and then transmigrate into tissues. Presence with heavy

glycosylation and other structural characteristics, ICAM-1 possesses binding sites for

some immune-associated ligands and serves as the binding site for entry of the major

group of human Rhinovirus (HRV) into various cell types. ICAM-1 also becomes

known for its affinity for Plasmodium falciparum-infected erythrocytes (PFIE),

providing more of a role in infectious disease. Previous studies have shown that

ICAM-1 is involved in inflammatory reactions and that a defect in ICAM-1 gene

inhibits allergic contact hypersensitivity.

**Synonyms**: MAL, CD54, Icam, Ly-4, Ly-47, Icam-1, MALA-2

**Endotoxin**: < 1.0 EU/mg of the protein as determined by the LAL method

**Formulation**: Lyophilized from a 0.2 µm filtered solution in PBS with 5% Trehalose and 5% Mannitol.

**Purity**: > 90% as determined by reducing SDS-PAGE.

**Bio-Activity**: Not validated for activity

**Storage**: Generally, lyophilized proteins are stable for up to 12 months when stored at -20 to

-80°C. Reconstituted protein solution can be stored at 4-8°C for 2-7 days. Aliquots of

reconstituted samples are stable at < -20°C for 3 months.
